

**Dental Hygiene  
Mobile Services, PLLC**

A logo for a dental hygiene service. It features a stylized white tooth icon with a blue swoosh and arrow extending from its base. To the right of the icon, the text "Dental Hygiene" is on one line, and "Mobile Services, PLLC" is on the line below it, both in a bold black sans-serif font.

# Dental Hygiene Mobile Services, PLLC

Welcome to Dental Hygiene Mobile Services PLLC. We are pleased to provide quality dental hygiene services to people without access to traditional dental facilities. Dental Hygiene Mobile Services is dedicated to developing a professional relationship with the patients, healthcare providers, and caregivers. Consistent dental care and evaluations enhances overall health and quality of life. We offer mobile services to provide dental industry stand of care protocols to persons living with disabilities, homebound, medically compromised, seniors within their homes, group homes, and assisted living as well as community and long-term care facilities.

## Dental Hygiene Services

**Adult Prophylaxis:** a “dental cleaning” for ages 13+ with minimal calculus and stain on their teeth.

**Child Prophylaxis:** a “dental cleaning” for ages 0-12

**Fluoride Varnish Application:** a procedure that places fluoride on the teeth that help to maintain the strength and integrity of the tooth structure and decrease the chances of decay

**Sealant:** a procedure that places a protective coating of plastic filling material into the pit and grooves on the biting surfaces of teeth that protect this surface from decay

NEW CLI

**Scaling and Root Planing:** a “deep” cleaning that involves cleaning the roots of teeth and treating for periodontal disease. This is established by measuring the pocket/space/gum tissue loss around each tooth.

**Full Mouth Debridement:** an initial cleaning that removes heavy amounts of stain and deposits from the teeth.

**Periodontal Maintenance:** a cleaning that is done after scale and rootplaning to maintain the cleanliness of the root pockets of the teeth. Usually this cleaning is done every 3-4 months.

**Smooth/polished restoration:** a procedure that polishes an existing restoration or smooths a fractured filling to stop causing harm to a patient’s cheek lip or tongue
